# CURTAIN COLLECTION

Transform your interior space

# The Trade Brands Curtain Collection

The Trade Brands Curtains collection by Hunter Douglas can transform your interior space by beautifully improving a room's appearance without compromising on functionality. Our fabric collection will allow you to choose from a large variety of colours, textures and patterns to provide you with a customised interior space.

Curtains are suitable for any interior setting as they assist with privacy and minimise heat entering the room.

# Why Choose Curtains?

## Style

With a wide variety of textures, colours and finishes, curtains can beautifully complement any interior style.

## Light Control and Privacy

Different levels of light control can be obtained through the different fabric opacities and lining offers that we have in our collection. Depending on the room setting and your needs, you can choose from Blockout curtains or Sheer curtains. Blockout curtains reduce light into the room while Sheer Curtains allow for natural light to filter into the room.

## Control Options

Choose either a manual or motorised control option. All control options are designed with child safety in mind.

## Warranty

We offer a Five Year Warranty on all our Curtains.

# Fabric Collection

Our fabric collection has been inspired by current interior trends and features a wide selection of plain, patterned and beautiful linen fabrics. You can select from sheer, uncoated, coated and lined fabrics to optimise for privacy, light control and insulation.

## Sheers

Sheer curtains are transparent and light weight fabrics that provide daytime privacy benefits to any interior setting. Our sheers give your home an elegant look while allowing natural light to flow through

## Uncoated

Uncoated curtains feature more tightly woven and softer fabrics offering elegance and privacy to your interior space. These fabrics require lining to be added underneath.

## Coated

Coated curtains have a coating on the reverse of the fabric blocking out the harmful UV rays entering your home. Additional Lining fabric is not required for these curtains.

## Lining

These are plain fabrics with heavy -duty coating applied to one side and provide room darkening, privacy and noise reductions benefits. Linings are usually layered with sheer or uncoated fabrics. Available in three options; light filtering, thermal or blackout lining.

Wave

Double Pinch Pleat

Pencil Pleat

# Heading Options

Heading styles have an important impact on the finished design of the curtain as they influence the overall look and feel of the room. It also has an influence on the way that the fabric falls and stacks when pulled to one side.

## Wave

The wave fold curtain, also known as ripple fold or S fold curtain, creates a simple yet elegant look. This soft flowing wave effect allows the fabric to drape beautifully creating even folds. By using a special heading tape, the fabric stacks neatly back to one side. These curtains can truly transform a space, adding softness to a room with the fabrics movement and texture.

**Available with:** Track or Rod

**Operating Options:** Manual or Motorised

## Double Pinch Pleat

Small groups of pleats separated by flat sections of fabric, evenly spaced along the curtain header. Pinch pleats allow for the curtains to hang in uniform folds and elegantly stack to the side. This style of curtain provides a sophisticated finish to formal and classic interiors.

**Available with:** Track or Rod

**Operating Options:** Manual or Motorised

## Pencil Pleat

Tidy and consistent folds makes the pencil pleat the most versatile curtain header style as they can be used to hang both blackout and sheer fabrics. This style is ideal for casual interior spaces such as relaxed living areas and cosy bedrooms.

**Available with:** Track or Rod

**Operating Options:** Manual or Motorised

# Hardware Options

## Tracked Rod

Curtain rods have dual functionality both for holding up curtains while adding a decorative feature to your interior, as they are designed to be visible. The metal rods are round in shape and are 28mm in diameter and compatible with wand operation and all curtain heading styles

**Available in:** Black, White and Light Bronze

**Mounting:** Mounted onto ceilings or walls

**Double Rod:** Combine more than one curtain such as a sheer curtain with a blackout curtain

Tracked Rod

## U Track

The U track is an internal tracking system that allows the curtain to be hung with a clean minimalist look. Made from aluminium for durability over wide expanses, the internal tracking system is compatible with wand operation for easy and smooth operation.

**Available in:** White

**Mounting:** Mounted onto ceilings or walls

**Double Track:** Combine more than one curtain such as a sheer curtain with a blackout curtain

U Track

# Control Options

## Wand Control

Wand control is a simple control solution that allows the curtain to be softly drawn open or closed along the rod or track. This eliminates the need to touch the curtain fabric for increased fabric protection.

The modern clear acrylic wand features a flush finish that seamlessly blends into the fabric and is positioned discreetly behind the curtain fabric.

The wand comes in variety of lengths to fit all window sizes and allows for left stacking, right stacking or centre opening configurations.

## Somfy® Glydea

A motorisation solution that allows you to operate your curtain at a touch of a button. The motorised system is quiet and offers a soft start and stop to protect the fabric. This control option is available across all types of curtains.
