

HunterDouglas WOODNATURE BLINDS

Product Information

WOODNATURE BLINDS OVERVIEW

Faux wood, real style!

WoodNature Blinds provide you the look of real wood, with the quality and durability of advanced technology that is resistant to discolouration and warping.

FUNCTIONALITY

WoodNature blinds give you complete control over the amount of light and ventilation you would like to let through. Enjoy filtered light throughout the day and complete privacy during the night.

LONG TERM PERFORMANCE

WoodNature Blinds have been produced from Polystyrene for long term performance on the window. Polystyrene provides improved resistance to fading, cracking and peeling, allowing these blinds to be used in areas with high humidity, extreme temperatures and direct sunlight.

CONSISTENT STYLE

The natural characteristics of real timber means many colour and grain variations which can produce an inconsistent looking product. WoodNature Blinds have been developed to capture the look of real wood whilst eliminating any inconsistencies producing a beautifully presented blind.

EASY MAINTENANCE

The composition of WoodNature Blinds means they are easy to maintain. The slats can be easily wiped and cleaned with a damp cloth with no need to continually re-stain the blinds as you do with real wood.

STRONGER SLATS

WoodNature allows for wider tape spacing due to the thickness of the slats lending more strength to the overall blind. This means less tape is needed making the fabrication and installation process quicker, as well as having fewer cords visible through the blind producing a more visually appealing end result.

PRODUCT SPECIFICATIONS

Slat Thickness	3.4mm +/- 0.1mm	All slat, bottom rail and valance can be purchased in 2.75m lengths, please refer to your price list for pack sizes. <ul style="list-style-type: none"> Slat cuts well and will not chip with 250/300 mm saw blade, type Z80. Punch holes do not crack or chip, provided punches are kept sharpened. To prevent scratching, we recommend opening boxes down the full length and removing the slat / rail / valance from the side of the box.
50mm Slat Weight	1m = 122gm	
Valance	90mm curved valance	
Bottom Rail	50mm x 15mm rectangular style	
Slats are available in two widths	50mm and 63mm	The Valance and the Bottom Rail are both made from PVC foam (more traditional faux wood material). They are better made this way, as co-extruded polystyrene does not work so well for complex shapes in thicker material. The valance and bottom rail are also painted, and printed with the same design as the slat so they match perfectly.

WoodNature blinds are covered by a 5 Year Warranty*.

MAXIMUM BLIND SIZES

Maximum Width	2400mm
Maximum Drop	3000mm
Maximum m ² (50mm & 63mm Slat) Operable Tilt only	3.6m ² 4.0m ²

SPACING (STRING TAPE AND WOVEN TAPE)

SLAT SIZE	MAXIMUM END DISTANCE	MAXIMUM BETWEEN ROUTS
50mm	152mm	400mm
63mm	152mm	400mm

STACKING MEASUREMENTS FOR FULLY RAISED BLIND

HEIGHT OF BLIND	800mm	1200mm	1600mm	2000mm	2400mm	2800mm
Raised Blind Height, With String Tape 50mm Slat	140mm	170mm	200mm	230mm	260mm	290mm
Raised Blind Height, With Woven Tape 50mm Slat	150mm	190mm	230mm	270mm	310mm	350mm
Raised Blind Height, With String Tape 63mm Slat	110mm	135mm	15mm	180mm	200mm	225mm

TESTING

UV

All Slats are coated with an acrylic UV top coat and are completely UV protected. In accelerated UV testing, all slats achieved a light fastness of 7 out of 8 where 8 features no colour change.

HEAT RESISTANCE

All the slats have undergone stringent heat testing and have achieved the following results:

- No distortion present between 48° - 65°
- 1.5mm maximum movement between 66° - 71°

PLASTIC TESTING

Incoming plastic raw materials are tested for lead content on a regular basis. (Must be less than 200 parts per million, US standard, part 1303, Title 16, Code of Federal Regulations, Chapter II – Consumer Products Safety Commission of USA). All submitted samples have passed testing and content is well below permitted limits for safety.
